To the people of the United States of America

May we never let greed or hatred cloud our vision of the
promise of this great country
a land where individuality and initiative are honored
a land where tolerance, reason, and an innate sense of
fairness encourage each of us to be more as a
nation than we would be as individuals

Introduction

What should an average citizen do when he happens upon a violent mugging? Is it OK to keep on walking and ignore the altercation? What if you were the person being mugged? Better yet, what would you do if you caught a pickpocket with his hand in your pocket? Would you stand there quietly and let it happen, or would you fight back?

That is what this book is all about — fighting back — fighting for what is rightfully yours.

The age of mass media has led to an era of mass propaganda. The disconnect between what we believe and what really is has left us vulnerable. This book will help you to discover how our vulnerability has been used to manipulate us into sanctioning policies that cost us a great deal. The price has been so great that the social and economic landscape is decaying at an alarming pace.

The 9/11 tragedy reminded us of how quickly change can occur. We have been able to recover from the attacks because our foundation is strong. However, if we allow our economic and our social structure to decay past a certain point, our nation will not be as able to recover from future hardships.

We cannot continue to build on the founding ideals of this nation without enlightened leadership. We cannot elect such leadership without our being able to weed through the slick, prepackaged propaganda that special-interest groups use to manipulate us into voting for their agenda.

If you are a taxpayer earning between \$50 thousand and \$500 thousand, you have been conned and robbed by the very people who have claimed to help you. For over a quarter century, you, as a rich taxpayer in America, have been greatly affected by tax cutting. Many of you have actively supported politicians promoting tax-cut policies. Despite such well-intentioned efforts, significant amounts of your hard-earned

money have been lost through misdirection and fraud. Not only that, new devices continue to be developed to increase the magnitude of losses that you, the rich, will face in the future.

In summary, this book will provide you with insight as to how you have been conned and robbed and what you can do to fight back against the Great American Fraud. Money is not everything by any means. However, in modern America, from money everything else flows. Lies can be morphed into truths with enough money to fund the propaganda blitz. Take a little time to learn how the flow of money to you is being diverted to those who need it the least.
